Blush Range

We love experimenting with colour. This journey explores innovative possibilities while wrestling with the volatility of recycled materials. If you have a colour brief that you'd like to see come to life, get in contact with us to arrange for custom colour prototyping.

In the exploration of colour and materiality, we can better understand our guiding principle of sustainability. While our colouring process is guided and refined, the nature of the aggregates leads to a natural variation in final tones.

This means that the samples received or seen during prototyping will never be an exact representation of the final result.
